FOREIGN POLICY & NATIONAL SECURITY

Peace Through Strength and Clarity

My vision for foreign policy and national security will get our nation back on the right track.

I am proud that the U.S.A. is the world's superpower and the custodian of the torch of liberty. I intend to keep it that way. You will never see me apologize for our greatness, or bow down to foreign leaders.

From my business experience, I know that weakness invites attack. This holds true for corporations and nations alike.

My pragmatic and principled approach to addressing complex world issues places the U.S.A. at the top. I will never relegate the U.S.A. to being just another country in the United Nations.

My approach upholds the highest ideals and traditions of the U.S.A, from the Founding Fathers to the Defending Fathers of today.

My national security and foreign policy vision, Peace Through Strength and Clarity, is an extension of the Reagan Philosophy. My objective is peace. My strategy is strength and clarity. I firmly believe that military strength, economic strength, and moral strength go hand in hand.

Security begins at home.

"As a business leader who has turned struggling companies around and made them successful, I will do the same for the U.S.A. I will make our country respected once again."

MY ASSESSMENT OF OUR KEY COUNTRY RELATIONS

I will clearly distinguish between our friends and our adversaries – and make it known that we will stand by our friends.
